## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 61 to 97 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 17 to 26, and 54 to 83 of copending Application No. 10/764,407. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the copending application is the dielectric properties. However, it would have been obvious to one of ordinary skill in the art that the diamondiod with the polymers would inherently have the same properties including the dielectric properties.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 61 to 97 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 to 64 of copending Application No. 11/013,638. Although the conflicting claims are not identical, they are not patentably distinct from each other because the sole difference between the instant claims and the copending application is the dielectric properties. However, it would have been obvious to one of ordinary skill in the art that the diamondiod with the polymers would inherently have the same properties including the dielectric properties.
